Stopping Accuracy and Stopping Behavior

How it works

KONE-installed instruments monitor key parameters.

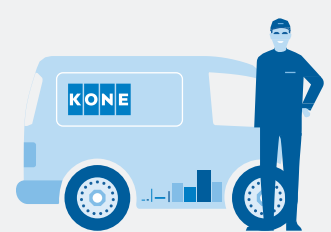

Artificial Intelligence helps analyze needs and helps predict faults.

Your technician gets instant notifications

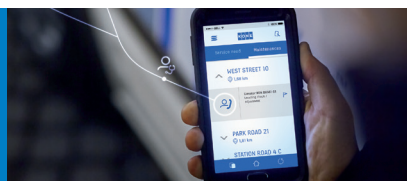

You stay up-to-date with KONE Online.

For immediate needs, you get fast, on-demand service. For non-urgent needs, your tech provides scheduled maintenance.

> Predictive maintenance helps keep your equipment up and running. <

KONE 24/7 Connected Services isn't just smart – it keeps getting smarter.
